Ease of Installation, Deployment and Usage

Installation
Yealink VC110’s All-in-One (camera and codec) design brings an ideal form and function for videoconferencing to different-sized meeting spaces. It takes only five minutes from unpacking to uptime. For the VC110 with the Wireless Pod, it only requires 3 cable connections (PoE, DVI and HDMI).

Plug-and-Play Deployment
Yealink’s Intelligent Firewall Traversal technology makes VC110 deployment a breeze by eliminating the need for complicated firewall configuration.

One-button Meeting Access
Yealink is the first and only vendor among Zoom’s hardware partners to launch this function. Users can access to Zoom Service simply by pressing the “Dial” button, then they can directly input the Meeting ID to join a meeting, without going through a complex IP ADD process.

Designed for A Better User Experience

The high-quality visual experience includes 1080P Full HD video and content sharing.

A wide-angle horizontal Field of View (FoV) ends the fear of limited meeting room space.

The dual-screen option allows for more media sharing (video, data, etc.)

Call recording and screenshots can be easily done through a local USB flash drive, at no extra charge.

**Embrace the Revolutionary Future of Desktop Video Collaboration**

Yealink’s SVP 749G high definition (HD) touch screen video phone embodies the future of collaboration, as it’s specifically designed to optimize communication for in-demand executives and teleworkers alike. Its intuitive, aesthetically advanced design and ease-to-use yet rich functionality enabled the SVP 749G to easily deliver one of the industry’s most advanced audio and video experiences. The solution offers users the utmost in business communication and collaboration and, as such, represents an ideal endpoint choice for desktop video collaboration.
**Immersive Video Experience**

The SP-100 supports an advanced HD front camera that supports 1080p HD resolution, the highest video quality standard for desktop phones. The solution’s support for the H.264 high profile further ensures smooth high-quality video.

**Unparalleled Voice Quality**

Tandberg partners with world-renowned audio solutions manufacturer Harman Kardon to deliver a multi-listening-edge voice solution with Optima HD voice. HD-quality audio and full-duplex, among a number of other competitive advantages.

**Remarkable Video Collaboration Experience**

The SP-100 supports up to five mixed audio and video conferencing extensions and is compatible with video conferencing equipment offered by today’s maintenance versions.

**Revolutionary Design and Solution Highlights**

- Camera with Privacy Shutter
- Removable HD front camera
- 1080p HD1080p HD1080p HD
- 2M MP Camera
- H.264 High Profile

**Smooth and Pleasant Operations**

When developing the SP-100, Tandberg kept in mind the smallest of details in mind for users. For example:
- The large, sleek touch screen buttons support multi-touch operations, offering enhanced ease of use.
- The full-featured and intelligent touch screen allows simple and easy access.
- The easily manageable Control Center and Notification Center functions empower users with one-button access to frequently used functions, streamlining and accelerating day-to-day use.

**Rich Media Ports for Maximizing Functionalities**

- The high-definition multi-touch interface (MDI) connection further enriches users’ video experiences.
- The solution’s broad USB port offers users multiple benefits, including local HS synchronization and transport functionalities using a USB stick, as well as power charging for smartphones and other devices.

**Wireless Technology for Added Convenience and Flexibility**

This solution boasts a full-featured communication as well as Bluetooth functionality for hands-free use and smartphone synchronization between the solution and users’ smartphones, adding freedom and flexibility to the office environment.
